1. SECURITY

1. 1. 1. 1. We treat data as an asset that must be protected against loss and unauthorized access. We employ many different security techniques to protect such data from unauthorized access by members inside and outside the Company. We follow generally accepted industry standards to protect the Personal Information submitted to us and information that we have accessed. We are using Cloud Service from AWS. We follow generally accepted industry standards to protect the Personal Information submitted to us and information that we have accessed. We are using SSL certificates to guarantee the safer transmission of data on our website. SSL Certificates are small data files that digitally bind a cryptographic key to an organization's details. When installed on a web server, it activates the padlock and the https protocol and allows secure connections from a web server to a browser. We also use reverse proxy servers before our actual servers. A reverse proxy server is a type of proxy server that is situated behind the firewall in a private network and directs client requests to the appropriate backend server. A reverse proxy provides an additional level of abstraction and control to ensure the smooth flow of network traffic between clients and servers.
2. However, as effective as encryption technology is, no security system is impenetrable. Our Company cannot guarantee the security of our database, nor can we guarantee that information you provide won't be intercepted while being transmitted to the Company over the Internet.
